CPD Review Manual (optional):

The latest version of the CPD Review Manual has been completely reviewed and updated with design details on all major systems to help you prepare for the CPD Exam. See ASPETexas.org for purchase link.

Calculator:

This class will be utilizing the Ti-30X IIS calculator (inexpensive options at Walmart, Walmart.com or Amazon - see website for links to purchase online).

Instructor's Notes:

A PDF downloadable file with invaluable notes, calculations and diagrams will be distributed to registrants prior to course start.

"Donald, Three of us from the Atlanta Chapter sat for the CPD exam and all three passed. I know that from my point of view, your review program was a huge benefit and I would not have been prepared without it.

Thanks for all of the work you did putting together and presenting it."

~Jashua F. - Atlanta, GA

Please note: This class is intended as a supplemental study resource for the CPD exam. Registrants should also utilize resources listed in the CPD Bulletin of Information.
